Test Cases
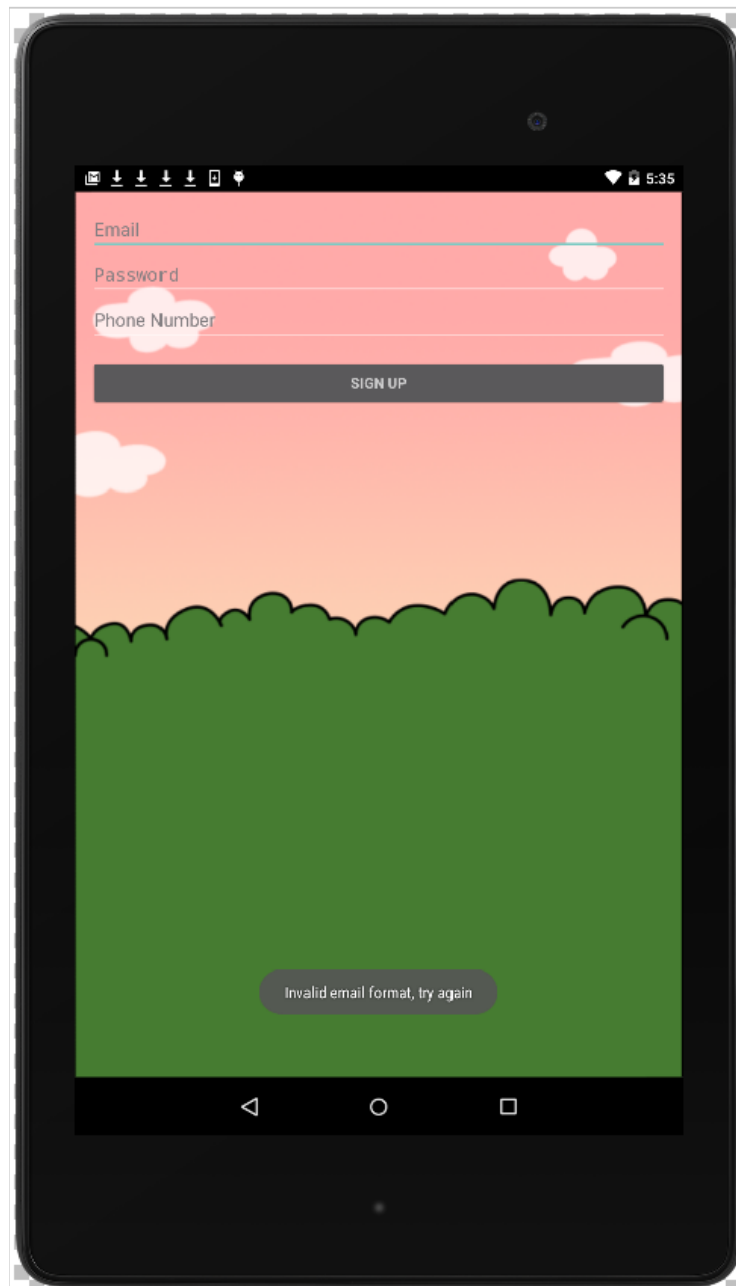

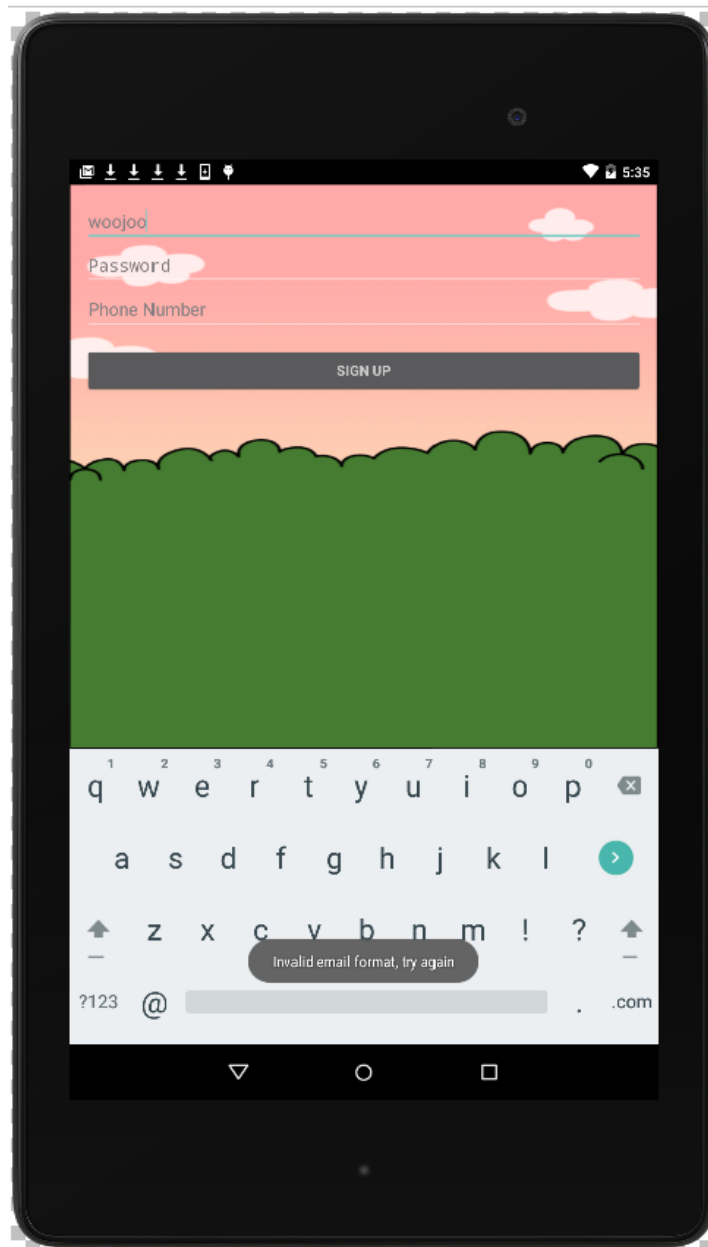

Team BCEO
12/11/2015
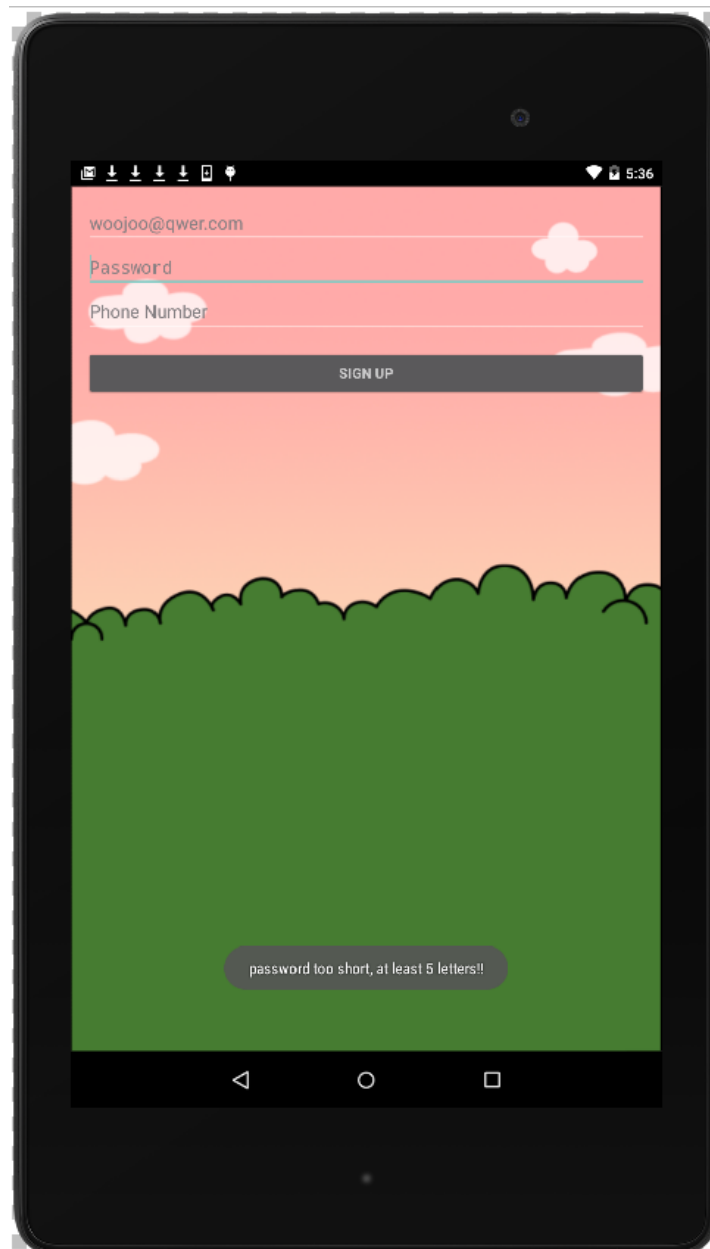

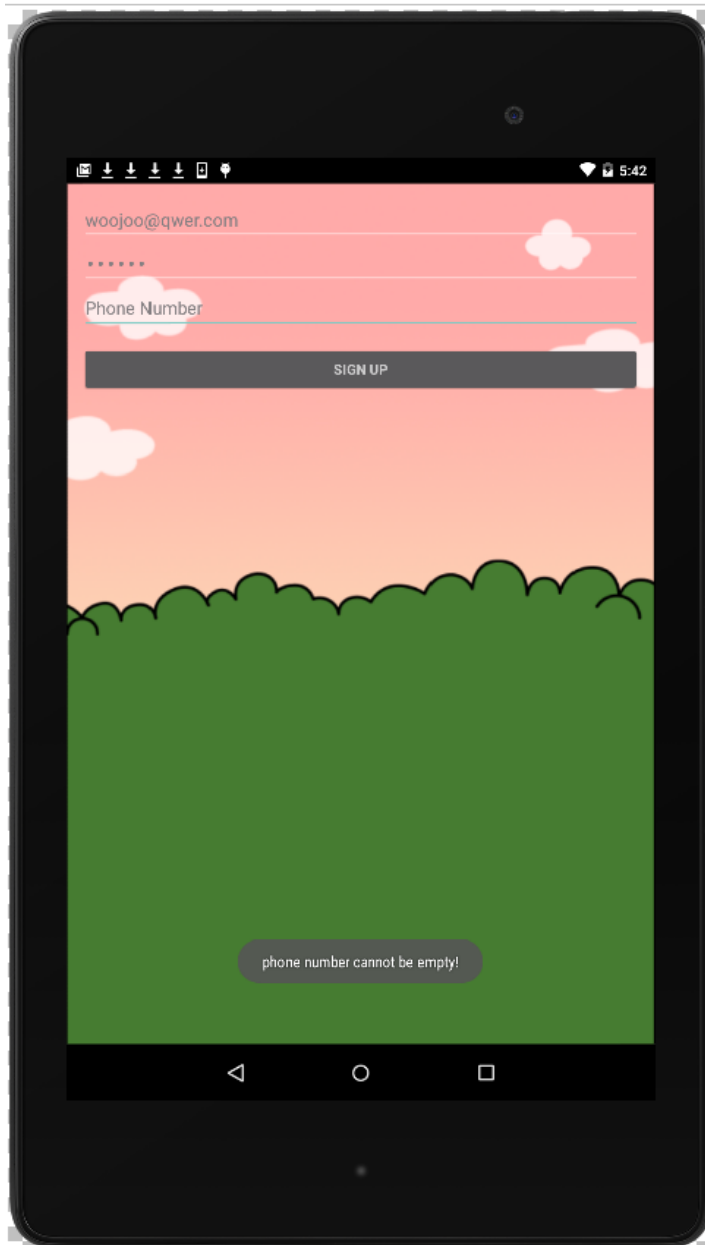

1. **Sign Up**
   1) empty email
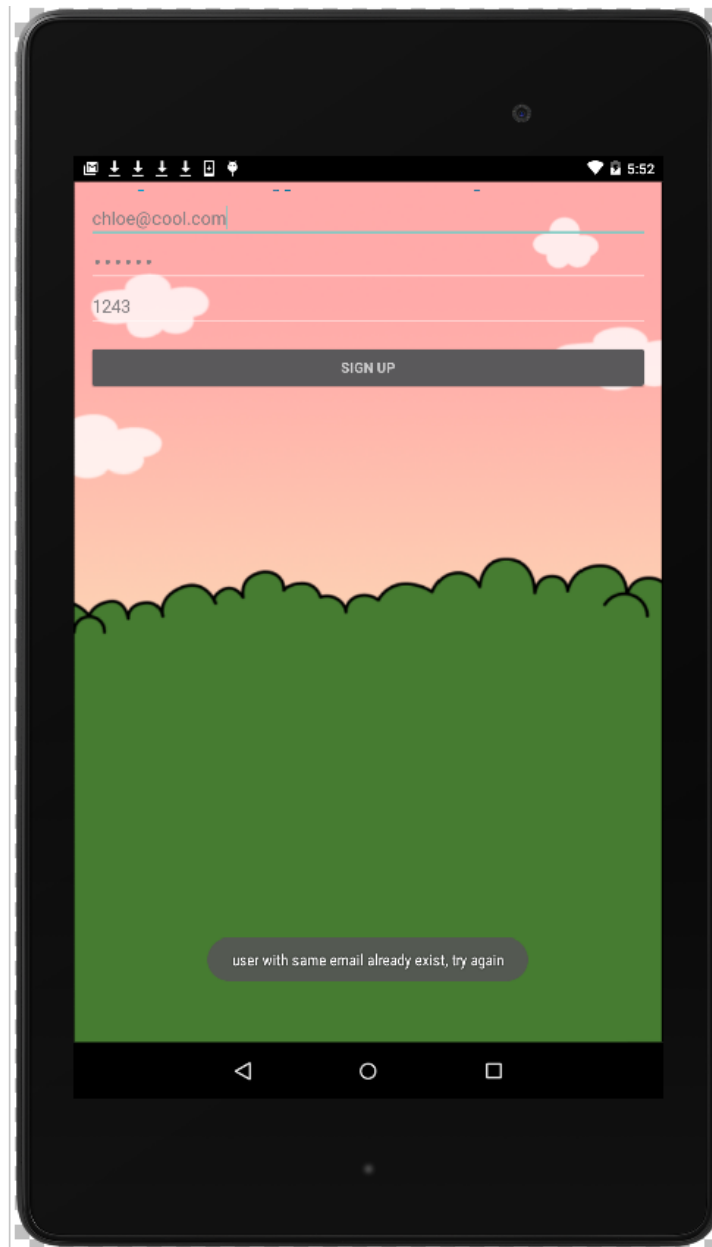

2) wrong format email (has to contain @ and .)

3) empty / or / short password

4) empty phone number

5) user already exist
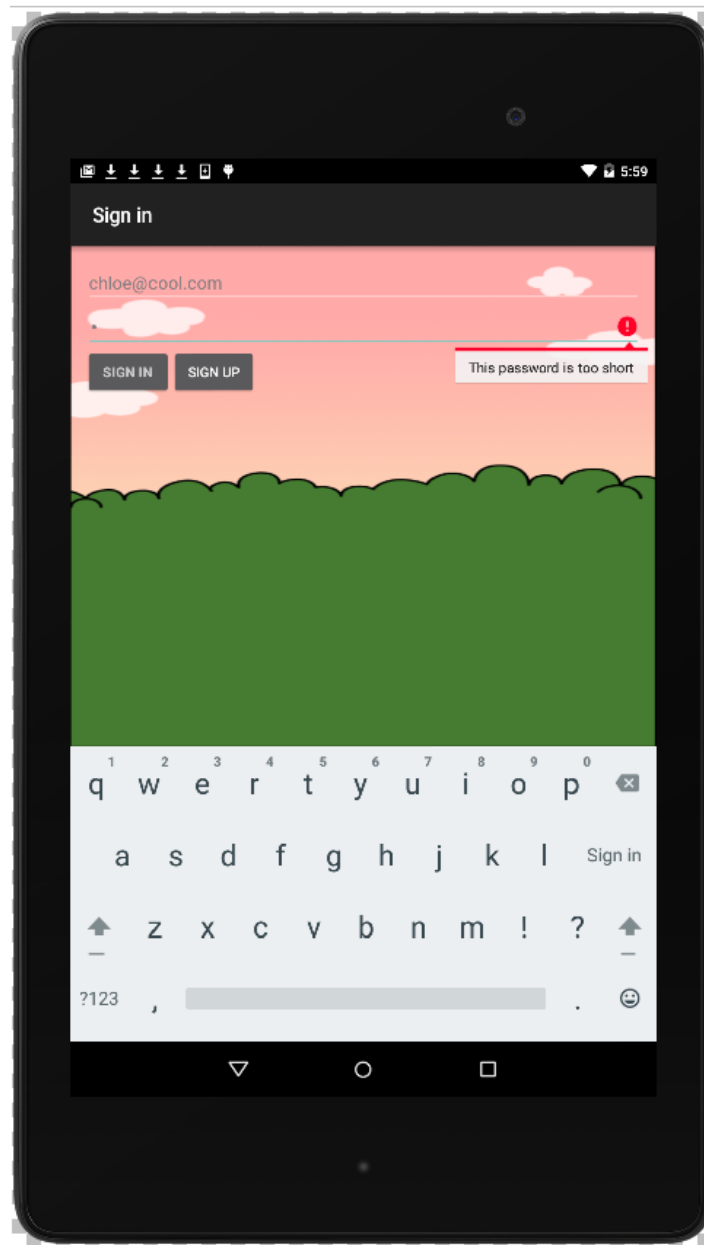

2. Sign In

   1) empty email

2) invalid email form

3) not existing user email

4) empty password /or/ invalid password format

5) wrong password

3. Verify Activity
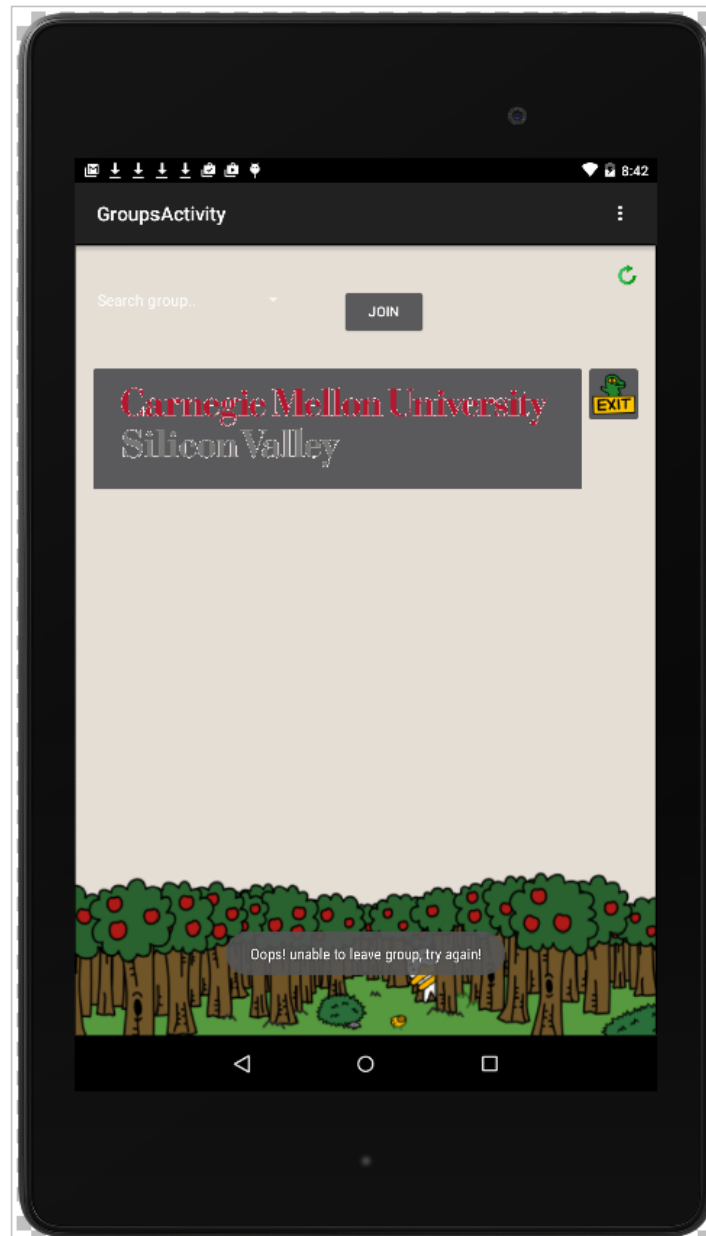

1) Empty email address

2) Not matching domain email address

4. Group Activity

1) Already joined in a CMU-SV group, but try to join CMU group. Sent email verification, but not verified yet so redirected to Group's main page with still CMU-SV group logo loaded. Then user goes to **webmail.andrew.com** and verify. User's group changed to CMU in the back-end. User try to click exit button for CMU-SV when that user is not valid user for CMU-SV anymore.

5. Sell

       1) No photo uploaded /or/ photo not selected and placed in the middle
